

Robert Vasquez.

Full-Stack Founder · Product Designer & Architect

Miami, FL

robertdanielvasquez at gmail dot com

A *self-taught founder*, entrepreneurial not institutional. I find where the truth is hidden, in food, in freight, in chemical risk, in a factoring book, and I build the *machine that makes it verifiable*. Six products, idea to distribution, the unglamorous parts included.

6 mo → 6 hr

An onboarding app I
built in 4 hours, a
~730× cut

6 products

Shipped solo across
finance, health & AI, in
~2 years

VFE
Vasquez Factoring Exchange

An entire factoring company that runs as software.
Automated capital deployment, underwriting, servicing & operations, every decision verified at source. Authored the strategy and architecture; building the Carrier App / MVP.
Founder & Architect · since 2026

● BUILDING

FactorFox Capital
FFC · financial engineering

A new financial product engineered end to end: the method to rate trade receivables, and the software that makes it possible. A software-native lender to factoring companies, built on the FactorFox and FactorEvo network.
Founder · Financial engineering · since 2025

● IN PROGRESS

AI Ingestion App
for FactorFox / FactorEvo

Architected, led development, and ran clients through it. Ingests years of financial data, **agnostic to source structure**, into a machine-readable feed for the factoring software. **Cut client onboarding from ~6 months to ~6 hours, built in 4 hours.**
Architect & Dev Lead · client-facing

● IN PRODUCTION

Sail
consumer health & AI

A clean-health brand in two parts: an AI nutritionist and calorie counter, and a browser extension that surfaces cleaner products where you shop. Both shipped 0 → 1 to production.
Founder & Product Designer · since Apr 2024

● LIVE

Trucker Co-Pilot
logistics fintech

AI co-pilot for truckers. Scan loads, estimate true costs, improve profitability through finance-driven workflows.
Product Designer · since Jul 2024

● BETA

AI Toxicology Risk Model
data infrastructure

Structured AI system inferring product-level toxicology risk, microplastics, PFAS, processing, where direct data doesn't exist. The first and only model built to fill that gap.
Architect & Research · since Dec 2025

● R&D

THE KIT FACTORY, 6 KITS IN A STANDING LIBRARY

- I package systems I have built into reusable **kits** : strip the project guts, wrap a safe front door, test, file. A future me, a teammate, or an AI can auto-deploy them.
- **Schema Mapping** , map any product to its exact data handles (built for my dad)
- **Site Deploy** , update a live site by talking to your AI
- **Auto-Auto Engine** , a heartbeat that advances a goal while you sleep and self-kills when done
- **GitHub Connector** , GitHub from chat, no MCP
- **Coordination & Records** , many chats, one folder, no collisions
- **Cloud Deploy** , ship to Cloud Run from chat via GitHub Actions

HOW THE FACTORY RUNS

- **Generic engine, concrete example.** Every kit ships the reusable system plus one real filled-in instance.
- **A safe front door.** One prompt or one command, guardrail built in.
- **Credentials never ship.** Tokens are read-only, never printed, never pushed, payload-scanned.
- **Test, record, repeat.** Validated offline, deposited to a log, indexed, zipped.
- Underneath: the auto-auto heartbeat, the VFE cascade, and custom connectors I built (build, GitHub, cloud, coordination).

Shipped & deployed

WEBSITES, DESIGNED, BUILT, LIVE

- **5** , freelance & in-house: my own, Sail, **live** FactorFox, FactorEvo, and a yoga studio, **sites** plus years of variants
- **vfe.capital** , a cinematic live site: history timeline, a Glass Box worked example, a live-book demo with an interactive kill switch
- **8** , incl. a scroll-driven Exchange **concept** Journey, a live-ledger hero, a WebGL **sites** 3D exchange hall, a Museum of Proof
- **Carrier** , a 2-screen Upload & Get Paid with **App** OCR plus Submitted, Verified, **prototype** Funded

04

Validation & network

ADVISORS & RECOGNITION

- **Daymond John Pitch Night, Winner**
- Advisor: **James Anibal** , Oxford PhD
- Connector **Matt** (well-relationship: **LaCapra** networked)
- 2 products launched idea to stores (app stores plus Chrome Web Store)

DECKS & PRODUCT DESIGN

- Investor / **decks for all** (FactorFox, strategy **three companies** FactorEvo, VFE)
- The **Daymond John** , winning deck & **pitch** delivery
- End-to- **product & UX** across every venture end **design** above
- Architecture of a brand-new financial product (FFC)

ROOMS I'VE BEEN IN

- **Leonardo** (NYU), the leading name on **Trasande** endocrine disruptors / microplastics
- **Food Packaging Forum**
- Finance leaders & capital connectors, meetings & active interest

05 Background & the human stats

EDUCATION & MERIT

- Florida International University, B.S. Finance & Information Systems · GPA 3.56
- 45 credits tested out via CLEP, IB & AP
- IB Diploma recipient · Florida Bright Futures (FAS) recipient
- Self-taught design, dev leadership & operations

LEADERSHIP & GRIT

- Fraternity President · IFC Treasurer · \$30k+ philanthropy raise led a
- HS swim captain · competitive swimmer
- Bench press 300 lb
- Licensed notary

06 What I actually do

an operating mode, not a skill list

- Run AI like a workforce. Conduct fleets of agents in parallel, output a company's worth of work solo, with systems that keep running while I sleep.
- Turn human judgment into running systems. Expertise trapped in one head, written down and executed by machine, with receipts for every decision.
- Compress a domain, then delete its worst bottleneck. Learn fast to operational depth, then automate the ugliest manual process (6 months to 6 hours).
- Operate the whole stack alone. Product, code, architecture, capital strategy, the legal litmus, go to market, the site, the deck, the deploy. Every department.
- Build the leverage, not just the product. Connectors, coordination protocols, automation that automates itself. I invest in how the work gets done.
